Vigorous Software Inc.

CAPABILITY STATEMENT

OpenAI Select Partner

Vigorous Software is a Toronto software company that builds and supports custom web applications, integrations, AI tools with human review, and text-message systems.

Toronto, Ontario (647) 370-2399 igor@vigoroussoftware.com vigoroussoftware.com

WHAT VIGOROUS SOFTWARE BUILDS

- Online forms, portals and internal tools
- Connecting the systems you already use
- AI with a person in the loop
- Text-message notifications and two-way messaging
- Taking over existing software

SELECTED WORK

Franklin Logistics franklinlogistics.ca

Signed contract to live production launch in 26 days, solo. Built a custom quote engine, Stripe payments, dispatch, magic-link driver app, two-sided SMS, automated Interac e-Transfer reconciliation, and bot hardening. Live in production and processing real customer orders.

AI-assisted SMS coaching platform US innovation consultancy / national-brand client, under NDA

Igor was sole engineer on a human-reviewed AI system with a generation pipeline, deterministic validation, PII scrubbing, admin review gates, Twilio keyword/opt-out state machines, scheduling, and cost controls.

A Techstars company Contract since Aug 2026, under NDA

AI agents in production; generation of long regulated documents with human legal review; currently building live two-way voice agents.

AuthoritySitesAI Earlier product

Built and operated a SaaS platform serving 1,065 paying customers, 2,144 generated sites, 64,000+ product reviews.

HOW WORK IS DONE

- One engineer from first call to long-term support: Igor Burban, Director, plans, builds and supports every project.
- A weekly report of hours and work done during active projects.
- AI with human review: validation in code, staff approval before anything consequential goes out, every decision logged.
- Your code lives in your organization's repository from day one; hosting and service accounts are in your organization's name.
- Support: reply within 1 business day; 30-day warranty on custom work.
- Canadian clients hosted in Toronto (DigitalOcean TOR1).
